Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

GitHub | Live Demo

- Built and deployed a full-stack complaint management system for students, wardens, and admins, secured with JWT authentication, role-based access control (RBAC), and protected REST APIs.
- Developed a complete complaint workflow with 8+ issue categories, priority levels, floor-based assignment, status tracking, notifications, and complaint history.
- Created role-specific dashboards for students, wardens, and admins covering complaint management, user administration, filtering, and analytics.

PROBLEM SOLVING

- Solved **300+ coding problems** on LeetCode and other platforms, covering arrays, strings, hashing, recursion, linked lists, trees, graphs, and dynamic programming.
