EDUCATION

B.Tech in Computer Science & Engineering

Parul University, Vadodara

Jul 2023 – Present

- CGPA: 7.55 / 10

Higher Secondary (12th)

GOVT. S.S SCHOOL, BRAHMPURA, MUZAFFARPUR

2022 – 2023

- Percentage: 69%

PROJECTS

Fake News Detector

In Progress

- Building a web app that checks if a news article or headline is likely real or fake using a machine learning model.
- Using Python and Scikit-learn to train a text classification model on a labeled news dataset.
- Cleaning and preparing text data (removing stopwords, tokenizing) before feeding it into the model.
- Designing a simple interface where users can paste an article or headline and get an instant prediction.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Flask

HostelCare — Hostel Complaint Management System | [GitHub](#) | [Live Demo](#)

Sep 2025

- Built a role-based complaint management system for students, wardens, and admins to solve slow and manual hostel complaint handling.
- Architected and deployed a full-stack web application supporting **3 user roles** (students, wardens, admins) across **8+ complaint categories**, designed to handle **50+ concurrent users**.
- Secured the application with **JWT-based authentication** and role-based access control to restrict data visibility by user type.
- Allowed students to raise complaints with image uploads for clearer issue verification and tracking.
- Added real-time complaint status tracking so students and wardens can easily see what stage each complaint is at, making the whole process more transparent

Tech Stack: Node.js, Express.js, MongoDB, React.js, Tailwind CSS, JWT Authentication

Airbnb Clone | [GitHub](#)

Mar 2025

- Built a simple Airbnb-style website where users can sign up, list properties for rent, search for places to stay, and leave reviews.
- Added user login and signup so each person can manage their own property listings.
- Created pages to add, edit, and delete property listings with images and descriptions.
- Enabled users to search and view available properties with details like price and location.
- Added a review and rating system so users can share feedback on properties they stayed at.

Tech Stack: Node.js, Express.js, MongoDB, EJS

SKILLS

Programming Languages	Java, JavaScript (ES6+), Python
Web Frameworks & Libraries	React.js, Node.js, Express.js, Tailwind CSS, EJS, HTML, CSS
Data Science & ML (Basic)	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Databases	MySQL, MongoDB
Tools & Platforms	Git, GitHub, Vercel, Render, Prompt Engineering
Soft Skills	Collaboration, Technical Communication, Problem Solving, Adaptability
